PDWT - SEMI-CONDUCTIVE / INSULATION DOUBLE LAYER
SCREENED INSULATING COMPOSITE TUBING

Typical Application: MV Cable joints

It is a screened insulating, composite tubing. The inner layer provides an excellent insulating layer over the connection of jointed single and multicore cables. The outer layer provides a conductive layer (screen function) for joints used on cables with XLPE or rubber or PVC insulation and on paper insulated cables.

The tubing is normally used in MV Cable Joints > 1kV.

It is available in various sizes, generally expanded in the ratio 2.5+:1 to make it range taking.

Test Parameters	Test Method	Test Requirement
Insulation Layer		
Tensile Strength	ASTM D 2671	10 MPa min.
Ultimate elongation	ASTM D 2671	200% min.
Volume resistivity	IEC 93	$10^{14} \Omega \cdot \text{cm}$ min.
Water absorption	ISO 62	0.5% max.
Semi Conductive Layer		
Tensile Strength	ASTM D 2671	12 MPa min.
Ultimate elongation	ASTM D 2671	200% min.
Volume resistivity	IEC 93	$10^4 \Omega \cdot \text{cm}$ min.
